

bites the dustbites the dustbites the dustbites the dustbites the dustbites the dust

A schematic diagram of a control panel. At the top left is a large black rectangular display. To its right is a small circle. Below the display are six vertical rectangular buttons, each containing a hash symbol (#).

Note: Exactly 36 keys on the module have been assigned values 1 to 6. While five of these keys are not shown, you will never see repeated keys with multiple different values via their combination of the labels and colors.
